DETAILED ACTION

Response to Arguments

Applicant's Notice of Appeal was received 5 May 2004. However, Applicant's arguments see response, filed 17 March 2004, with respect to the rejection(s) of claim(s) 1-36 under USC 102 and/or 103 and/or 112 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. Additionally, Examiner is persuaded by Applicants' arguments regarding the Finality of the previous Office Action. Therefore, the Final Rejection has also been withdrawn.

Allowable Subject Matter

Claims 1-36 are allowed.

The following is an examiner's statement of reasons for allowance: Each of the claims contains the limitation that a cavity be enclosed by an exterior wall of the solder ball. This limitation, in conjunction with the other claimed limitations was neither found to be disclosed in, nor suggested by the prior art.

Although US 6,084,781 (hereafter Klein) appears to have a similar structure to the instantly claimed invention (see figure 3), there are fundamental differences, which distinguish the instant invention from the prior art. Most importantly, the structure disclosed in Klein while having a cavity within the solder pad (110), this cavity could not be interpreted as being enclosed by the solder ball, nor would it be obvious to the ordinarily skilled artisan to make the solder ball do so. For at least this reason, the instantly claimed invention is found to be distinguished from the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 6,084,781 granted to Klein (relevance noted above).
